

HEAT RESISTANT GLASS FOR

# HORECA

The Karlovy Vary porcelain factory **G.BENEDIKT**, founded in 1881, combines master craftsmanship and precision in porcelain production. Since the foundation stone of our porcelain factory was laid, we have become synonymous with top quality porcelain. Today, we are one of the largest porcelain factories in the Czech Republic, specializing mainly in the production of hotel porcelain. By combining unique tradition and modern design, we create porcelain that not only captivates with its beauty, but also fully meets the demands of practicality and functionality. Over time we have found important collaborators and allies in Austria and Switzerland, the companies Lilien Austria and Suisse Langenthal. Today, together we form the „**G.BENEDIKT GROUP**“. Despite the different countries of origin, we have one thing in common - extremely durable porcelain that deserves your attention. **G.BENEDIKT** is more than just porcelain; it is a symbol of Czech craftsmanship that proudly represents the Czech Republic in the world.

**SIMAX<sup>®</sup>**  
**Glass that Lasts**

**SIMAX** is a trademark of the **KAVALIERRGLASS**, a.s. glassworks in Sázava, which is one of the world's leading producers of borosilicate or boiling glass with more than 185 years of tradition. **SIMAX** boiling glass products are smooth and non-porous, perfectly transparent, catalytically indifferent, corrosion-resistant even in demanding operation up to 300°C without sudden temperature changes. In addition to household glassware such as teapots, jugs or mugs, the glassworks also produces industrial and laboratory glassware. Most of the production is exported to more than 90 countries.

# HEALTH AND SAFETY

The glass factory KAVALIERRGLASS, a.s. implemented the quality system according to ČSN ISO 9001 standard, which is regularly justified at the Prague certification authority branch. This system guarantees, that all defined requirements are observed in all phases of the production cycle. From customer satisfaction surveys, customers' requirements implementation, buying raw materials, production preparation, production itself, handling of waste, final control, packaging, shipping and selling to the customers and feedback processing.

SIMAX glass which is remarkable for its high temperature and chemical resistance. All the products are classified as food-contact suitable and have a health safety certificate. SIMAX glass also meets hygiene standards. It is non-porous, inert to hot and aggressive fluids effects, it does not flavours or odours.

SIMAX pressed products are hardened. It means that the products go through a controlled process, during which a pressure stress is created on the surface of the walls and this pressure is constantly protecting the product from mechanical and thermal shock. This pressure also increases its resistance from breaking or cracking.
